1/19/71

Paul (Gary),

Returned after a two-day absence last night. Had chance to read newest and very clever and detailed government move in clothing/pix suit. It will require much work and perhaps more care thatn there is time for. So, I ll be tied up for a while.

This is to hastily report that I now have all the CD75 pages. The 11 that Jim had forgotten include the NO T-5 one that you got from DJ and a deBrueys Dallas report that a NY source provided a copy of a letter LHO had written FPCC and little else, nothing sensational in that.

I have to go to DC this a.m. for bursitis theraphy. I am also seeing Bud and will hear what progress is being made/has been made in copying. If there is something to say or something to be sent, either will be done. However, if there is delay, if they do not deliver any until all is done, if you have urgent need (which I take it from your representation of your work/school preoccupation there isn't) I'll lend you the copies I have, for return after you get your full set.

I do not thing it is necessary or worth the extra trouble, but I do not want to make your decisions for you, so I make this offer instead.

I have given you a hasty rundown on the rest. One other thing withheld is a Voebel interview, the apparent reason is less than complete consistency with his (preferred) testimony version and a representation of closer relationship that he perhaps testified to with LHO.

Best,
HW
